Subject Index of Volume 46

Acrylamide
  bioconversion of acrylonitrile into acrylamide using a highly compact multiphasic reactor, B43
Acrylonitrile
  bioconversion of acrylonitrile into acrylamide using a highly compact multiphasic reactor, B43
Activity
  stable catalyst for heavy oil processing. III. Activity and selectivity, 61
Activity coefficients
  activity coefficients from a virial expansion about their infinite dilution values, 35
Adsorption
  reversed displacement chromatography of adsorptions with unfavorable equilibrium isotherms, B93
Aerobic trickling filters
  partial wetting model for aerobic trickling filters, B59
Agitated extraction columns
  single drop experiments with liquid test systems: a way of comparing two types of mechanically agitated extraction columns, 137
Alumina
  kinetics of carbon formation from CH_4–H_2 mixtures on nickel–alumina catalyst, 129
Aqueous extraction
  new salt–polyethylene–glycol systems for two-phase aqueous extraction, B31

Binary liquid mixtures
  activity coefficients from a virial expansion about their infinite dilution values, 35
Bioconversion
  bioconversion of acrylonitrile into acrylamide using a highly compact multiphasic reactor, B43
Bran
  supercritical fluid extraction from dry mouldy bran for the purification of gibberellic acid from the concomitant products produced during solid state fermentation, B53
Brevibacterium sp.
  bioconversion of acrylonitrile into acrylamide using a highly compact multiphasic reactor, B43
Butanol
  integration of pervaporation and continuous butanol fermentation with immobilized cells. I: Experimental results, B1
  integration of pervaporation and continuous butanol fermentation with immobilized cells. II: Mathematical modelling and simulations, B11

Calcium oxide
  on the kinetics of dry desulfurization with calcium oxide, 119
Carbon dioxide
  desorption with chemical reaction in the system CO_2-aqueous solution of potassium carbonate, 1
Carbon formation
  kinetics of carbon formation from CH_4–H_2 mixtures on nickel–alumina catalyst, 129
Catalysts
  kinetics of carbon formation for CH_4–H_2 mixtures on nickel–alumina catalyst, 129
  modélisation de la désactivation du catalyseur Pt–Sn/Al_2O_3 lors de la déshydrogénation du méthylcyclohexane, 109
  selectivity behaviour of non-uniform catalysts for the consecutive reactions A→B→C, 91
  stable catalyst for heavy oil processing. III. Activity and selectivity, 61
Circumferential velocity
  effective interfacial area in mechanical thin-layer apparatus, 69
Complex reaction systems
  parametric sensitivity of complex reaction systems, 23
Conical vessels
  liquid fluidization in conical vessels, 15
Crystallizer
  Monte Carlo simulation of the crystal size distribution in a continuous sucrose crystallizer, B35

Dehydrogenation
  modélisation de la désactivation du catalyseur Pt–Sn/Al_2O_3 lors de la déshydrogénation du méthylcyclohexane, 109
Desorption
  desorption with chemical reaction in the system CO_2-aqueous solution of potassium carbonate, 1
Desulfurization
  on the kinetics of dry desulfurization with calcium oxide, 119
Diffusion
  diffusion phenomena in the spherical matrices used for cell immobilization, B21
  liquid fluidization in conical vessels, 15
Dilution
  activity coefficients from a virial expansion about their infinite dilution values, 35
Displacement chromatography
  reversed displacement chromatography of adsorptions with unfavorable equilibrium isotherms, B93
Distillation
  equilibrium vaporization of oils by the chain-of-rotators group contribution equation of state, 29
  finding the optimum sequence of distillation columns – an equation to replace the "rules of thumb" (heuristics), 97
Drop breakage
  single drop experiments with liquid test systems: a way of comparing two types of mechanically agitated extraction columns, 137

Elsevier Sequoia/Printed in The Netherlands

Enzymes
effect of temperature on the reversed micellar extraction of enzymes, 149
Equilibrium vaporization
equilibrium vaporization of oils by the chain-of-rotators group contribution equation of state, 29
Ethanol
diffusion phenomena in the spherical matrices used for cell immobilization, B21

Fermentation
heat transfer in aerated and non-aerated mycelial fermentation systems in stirred tank reactors, B83
integration of pervaporation and continuous butanol fermentation with immobilized cells. I: Experimental results, B1
integration of pervaporation and continuous butanol fermentation with immobilized cells. II: Mathematical modelling and simulations, B11
Fixed bed reactor
selectivity behaviour of non-uniform catalysts for the consecutive reactions A→B→C, 91
Fluid extraction
supercritical fluid extraction from dry mouldy bran for the purification of gibberellic acid from the concomitant products produced during solid state fermentation, B53
Fluidization
computer-aided analysis of fluidized bed to external wall local heat transfer, 47
liquid fluidization in conical vessels, 15

Gibberellic acid
supercritical fluid extraction from dry mouldy bran for the purification of gibberellic acid from the concomitant products produced during solid state fermentation, B53
Glucose
diffusion phenomena in the spherical matrices used for cell immobilization, B21

Heat transfer
computer-aided analysis of fluidized bed to external wall local heat transfer, 47
heat transfer in aerated and non-aerated mycelial fermentation systems in stirred tank reactors, B83
Heavy oil
stable catalyst for heavy oil processing. III. Activity and selectivity, 61
Hydrodenitrogenation
kinetics of hydrodenitrogenation of quinoline in the presence of H_2S, H_2O and NH_3 using an integral flow reactor, 79
Hydrodynamics
computer-aided analysis of fluidized bed to external wall local heat transfer, 47

Immobilization
diffusion phenomena in the spherical matrices used for cell immobilization, B21
integration of pervaporation and continuous butanol fermentation with immobilized cells. I: Experimental results, B1
integration of pervaporation and continuous butanol fermentation with immobilized cells. II: Mathematical modelling and simulations, B11
Integral flow reactor
kinetics of hydrodenitrogenation of quinoline in the presence of H_2S, H_2O and NH_3 using an integral flow reactor, 79
Interfacial area
effective interfacial area in mechanical thin-layer apparatus, 69
Isotherms
reversed displacement chromatography of adsorptions with unfavorable equilibrium isotherms, B93

Kinematic viscosity
effective interfacial area in mechanical thin-layer apparatus, 69
Kinetics
on the kinetics of dry desulfurization with calcium oxide, 119

Methylcyclohexane
modélisation de la désactivation du catalyseur $Pt–Sn/Al_2O_3$ lors de la déshydrogénation du méthylcyclohexane, 109
Monte Carlo simulation
Monte Carlo simulation of the crystal size distribution in a continuous sucrose crystallizer, B35
Multiphasic reactor
bioconversion of acrylonitrile into acrylamide using a highly compact multiphasic reactor, B43
Multistage crystallizer
modelling and simulation of a multistage crystallizer, 9
Mycelium
heat transfer in aerated and non-aerated mycelial fermentation systems in stirred tank reactors, B83

Nickel
kinetics of carbon formation from $CH_4–H_2$ mixtures on nickel–alumina catalyst, 129

Oils
equilibrium vaporization of oils by the chain-of-rotators group contribution equation of state, 29

Parametric sensitivity
parametric sensitivity of complex reaction systems, 23
Partial wetting
partial wetting model for aerobic trickling filters, B59
Pervaporation
integration of pervaporation and continuous butanol fermentation with immobilized cells. I: Experimental results, B1
integration of pervaporation and continuous butanol fermentation with immobilized cells. II: Mathematical modelling and simulations, B11

Polyethylene glycol–maltodextrin
protein extraction in a spray column using a polyethylene glycol–malodextrin two-phase polymer system, B75
Population balance
modelling and simulation of a multistage crystallizer, 9
Potassium carbonate
desorption with chemical reaction in the system CO_2-aqueous solution of potassium carbonate, 1
Protein extraction
protein extraction in a spray column using a polyethylene glycol–malodextrin two-phase polymer system, B75
Pt–Sn/Al_2O_3 catalyst
modélisation de la désactivation du catalyseur Pt–Sn/Al_2O_3 lors de la déshydrogénation du méthylcyclohexane, 109

Quinoline
kinetics of hydrodenitrogenation of quinoline in the presence of H_2S, H_2O and NH_3 using an integral flow reactor, 79

Reversed micellar extraction
effect of temperature on the reversed micellar extraction of enzymes, 149

Salt–polyethylene–glycol systems
new salt–polyethylene–glycol systems for two-phase aqueous extraction, B31
Selectivity
stable catalyst for heavy oil processing. III. Activity and selectivity, 61
selectivity behaviour of non-uniform catalysts for the consecutive reactions A→B→C, 91
Solid state fermentation
supercritical fluid extraction from dry mouldy bran for the purification of gibberellic acid from the concomitant products produced during solid state fermentation, B53
Spherical matrices
diffusion phenomena in the spherical matrices used for cell immobilization, B21
Spray column
protein extraction in a spray column using a polyethylene glycol–malodextrin two-phase polymer system, B75

Temperature
effect of temperature on the reversed micellar extraction of enzymes, 149
Thin-layer apparatus
effective interfacial area in mechanical thin-layer apparatus, 69

Virial expansion
activity coefficients from a virial expansion about their infinite dilution values, 35
